How the assessment works?

The diagnostic tool uses a simple and effective online questionnaire which is linked to a comprehensive knowledge base .

The report is returned to the respondent instantly, provides a detailed report of key drivers in the business against best practice.

The report highlights areas for improvement and provides suggested actions and sources of help.

Organisations can use the guidance in the report and then develop a continuous internal improvement programme or they can opt for a consultation with (NI) / Semta on next steps and support available.

TRS (Talent Retention Solution)

Engineering Training Council in partnership with Semta, is to implement a national 'Talent Retention Solution' programme which will complement existing recruitment activity in our sector by facilitating redeployment of skilled workers. Nissan and Siemens joined forces to launch the highly anticipated programme which will:

- › Complement existing commercial recruitment activity to help employees at risk of redundancy quickly find suitable jobs
- › Operate across the four nations supporting large, medium and small companies

retention and employment through a mechanism and network to allow large scale redeployment to be a practical part of resource planning for both shrinking and growing activities

To see who is already involved please visit

http://www.youtube.com/watch?feature=player_embedded&v=Ffy32n3o5Pk

For further information (NI) on TRS please contact Gillian Winters at ETC who will be happy to help you. gillian.winters@etcni.org.uk
